# Our Team

Founder

**Chamara** Wijesinghe

With a Bachelor's Degree in Furniture and Interior Design, a postgraduate qualification in Landscape Architecture and certified in green building consultancy, Chamara has a wide knowledge of designing and he has been part of many projects across the country and in different parts of South Asia. He was also involved in creative art projects, photography and paintings. As a landscape architect, he works closely with the environment and weaves it into every element of the design. A focus on research and a detail-oriented approach to landscape architecture sets him apart: He thoroughly researches the environment of the project and brings in creative solutions that allow for innovative but practical and environment-friendly approaches that are sustainable.

Biophilia is the proud development of many young minds from various fields: It includes a core team of an Architect, Landscape Architects, an Interior Architect, a Quantity Surveyor, a plant scientist, product designers, engineers, and a curator working towards the overall vision. The Nurseries are well managed by a plant specialist, planting manager and managers. Through their combined efforts, Biophilia has come a long way and has been able to assist many in making the jump to a sustainable future.

## Search & Learn about plants

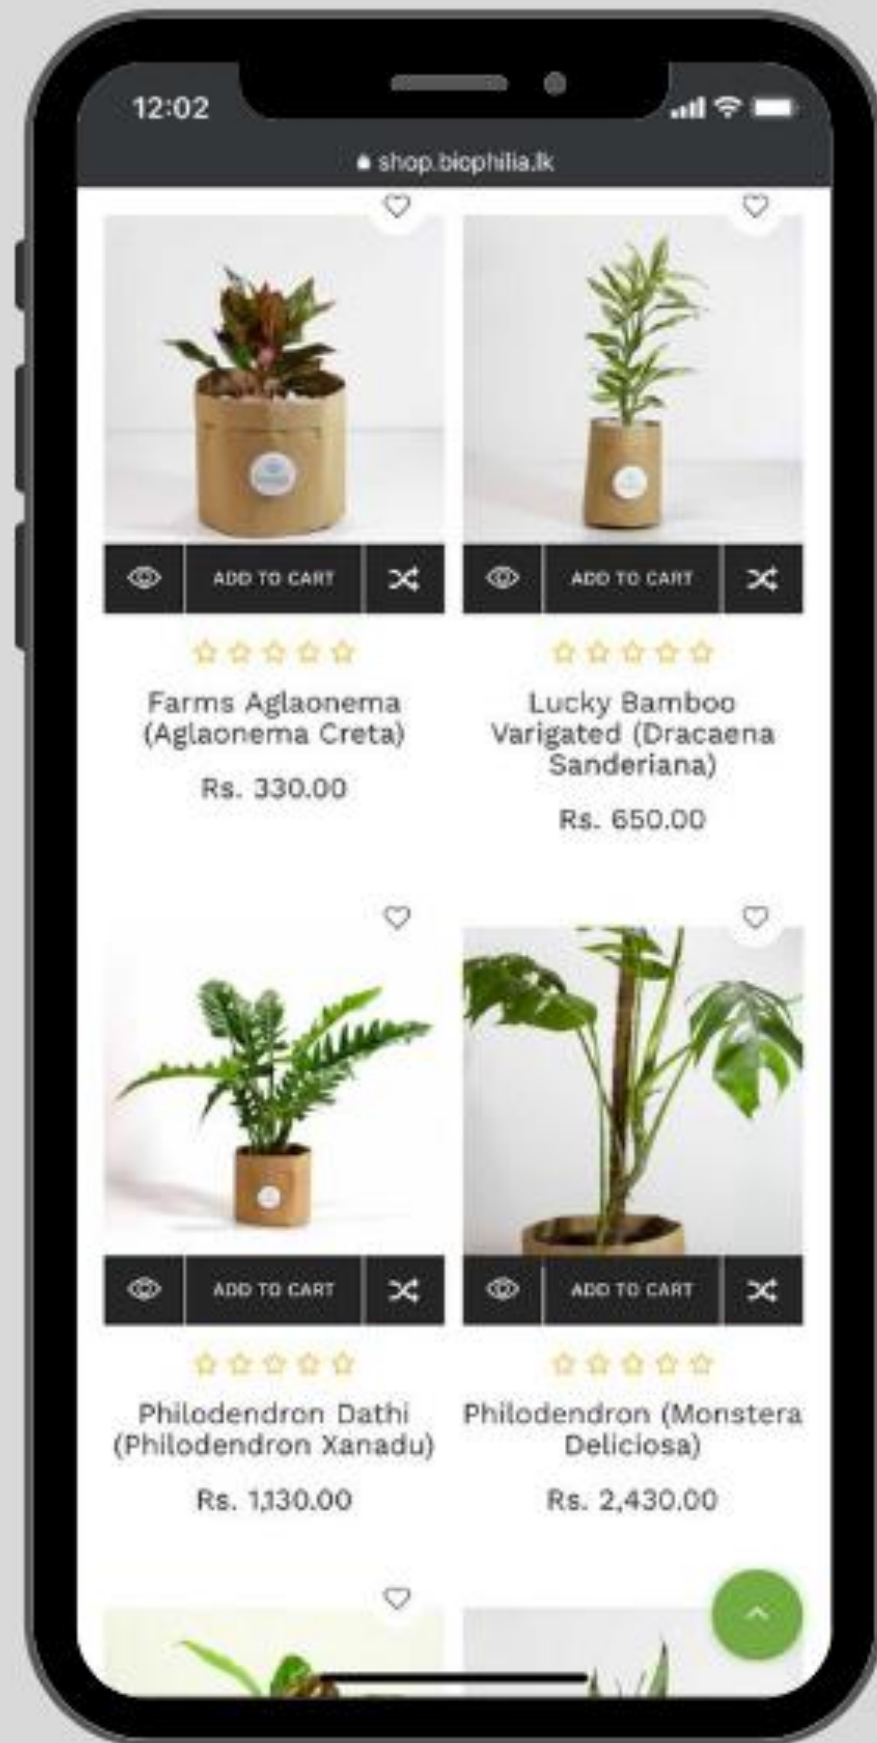

CSR initiative on Sri Lanka's first ever plant database.

Biophilia knowledge base is an online free-to-use information database and associated website for those interested in useful plants.

The objectives of the charity are 'to advance the education of the public by the promotion of all aspects of ecologically sustainable horticulture and agriculture with an emphasis on tree, shrub and other perennial species; and the undertaking of research into such horticulture and agriculture, and dissemination of the results of such research.

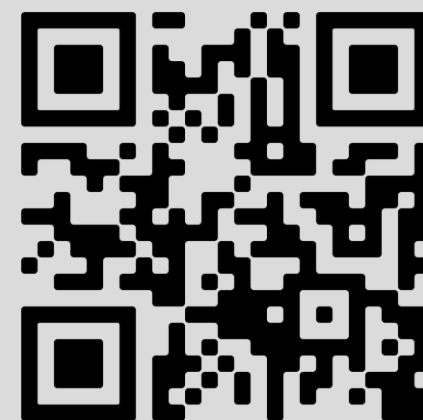

# Online shopping cart

of modern garden and urban lifestyle products

We share a passion for plants and gardening with you understanding just how important it is to get it right.

Working with an extensive network of growers and suppliers, coupled with a trusted courier service - we deliver plants to your door, leaving you more time to do what you love.

# Our projects

# Hotel & Restaurants

# The Blue Water @ Wadduwa, Sri Lanka

Hotel Landscape Renovation | Union Resort & Spa | Client: Mr. Ajith Wijesekara

The renowned Archt.Geoffrey Bawa's one of the main concepts of this design is borrowed landscaping. Due to the new constructions, the concept was disturbed and we did cover the concrete views using landscaping. Considering the privacy of the hotel users, we also created views more scenic while preserving the privacy at the same time. We also reorganized the courtyards and enhanced the landscape by using only the limited number of suitable trees.

# Water Garden @ Sigiriya, Sri Lanka

Hotel Landscape | Union Resort & Spa | Client: Mr. Ajith Wijesekara

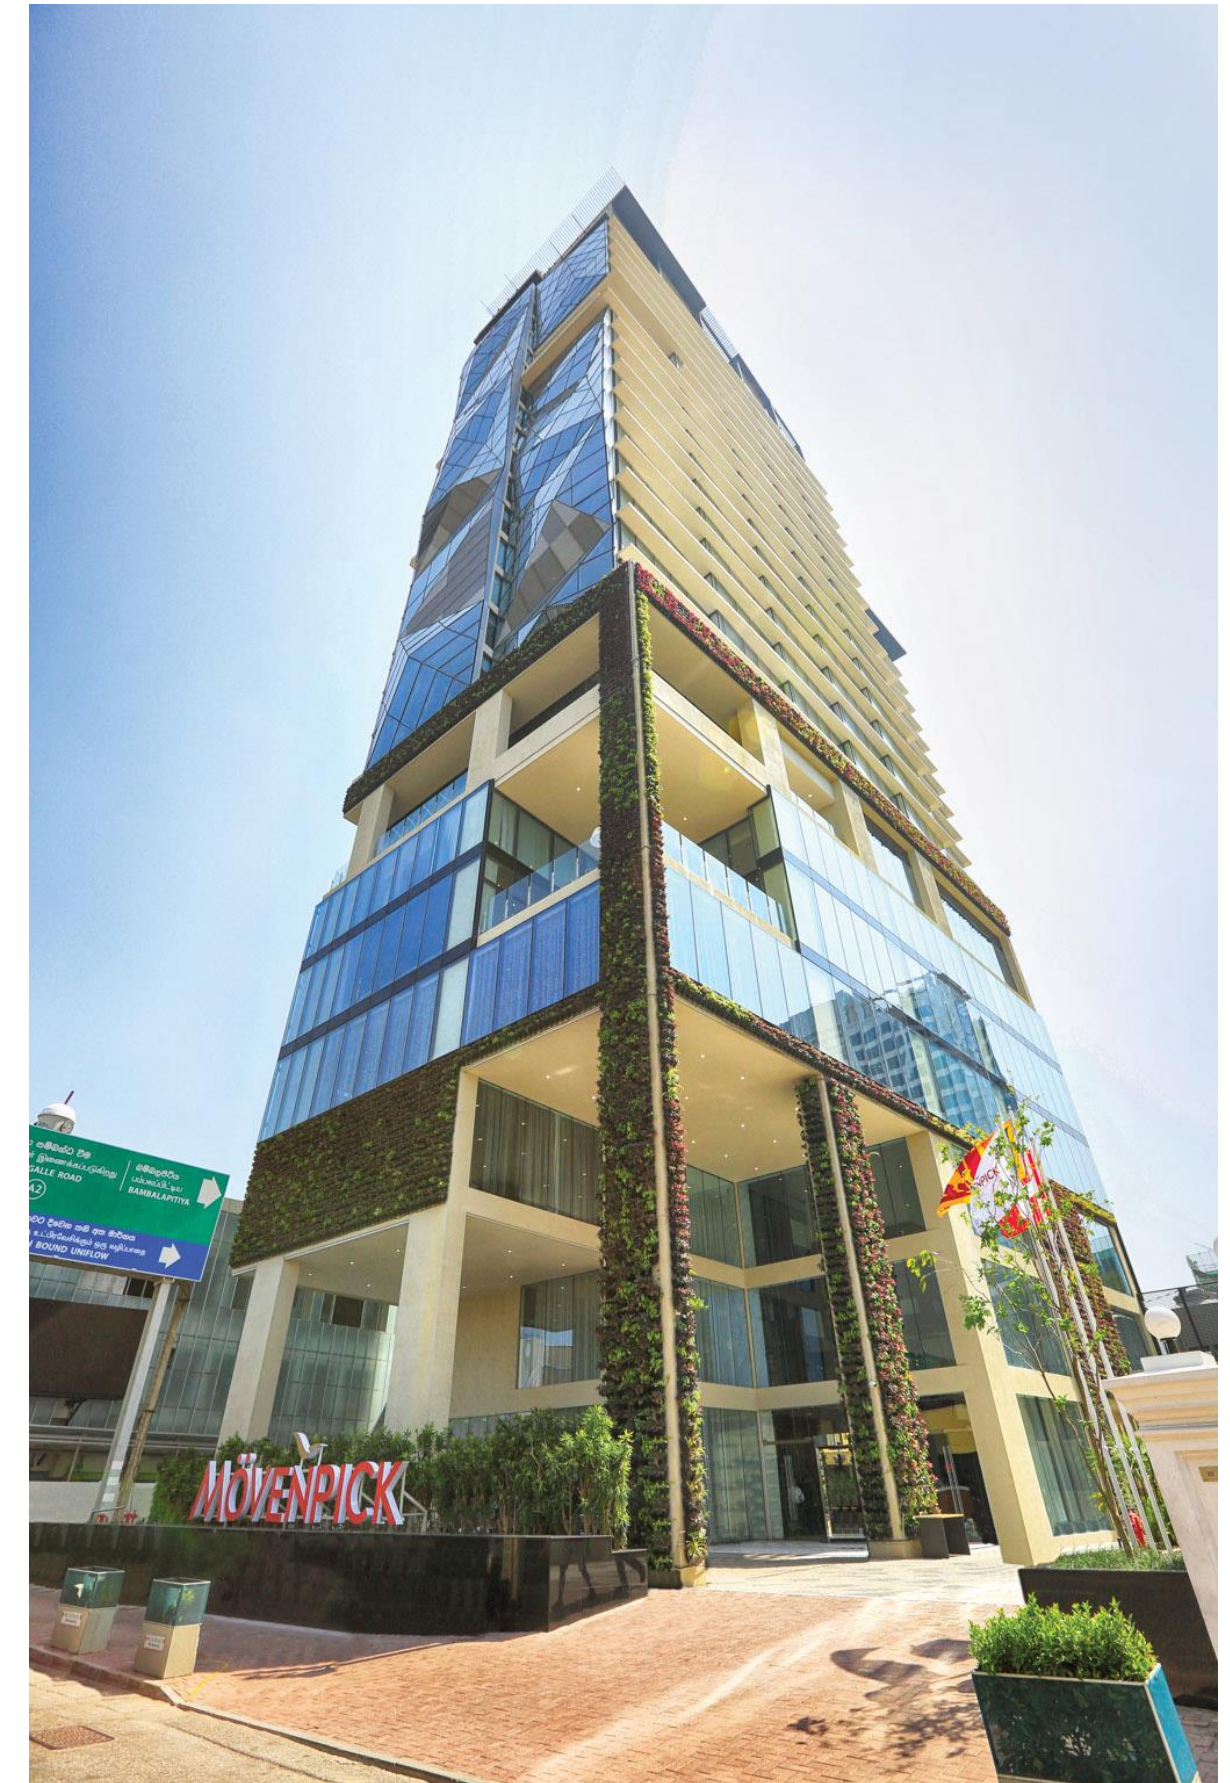

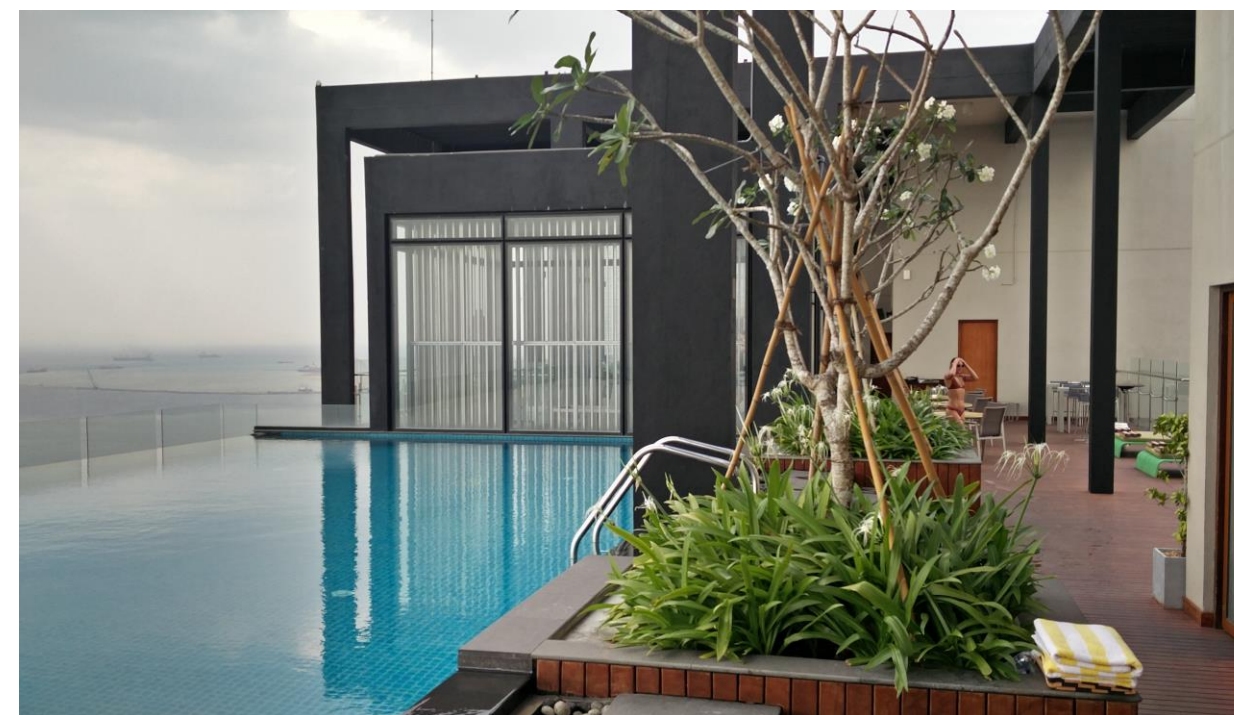

# Movenpick @ Kollupitiya, Sri Lanka

Hotel Landscape | Movenpick Hotels & Resorts | Client: Mr. Ashok Pathirage

State-of-the-art MOVENPICK CITY Hotel is located in the heart of the Colombo Metropolitan. Appropriate plants for vertical gardens were examined during the research. Since one side of the hotel is facing the sea, special attention was given to marine plants. For the rest which is surrounded by the land, we selected plants bearing flowers to enhance the aesthetic aspect.

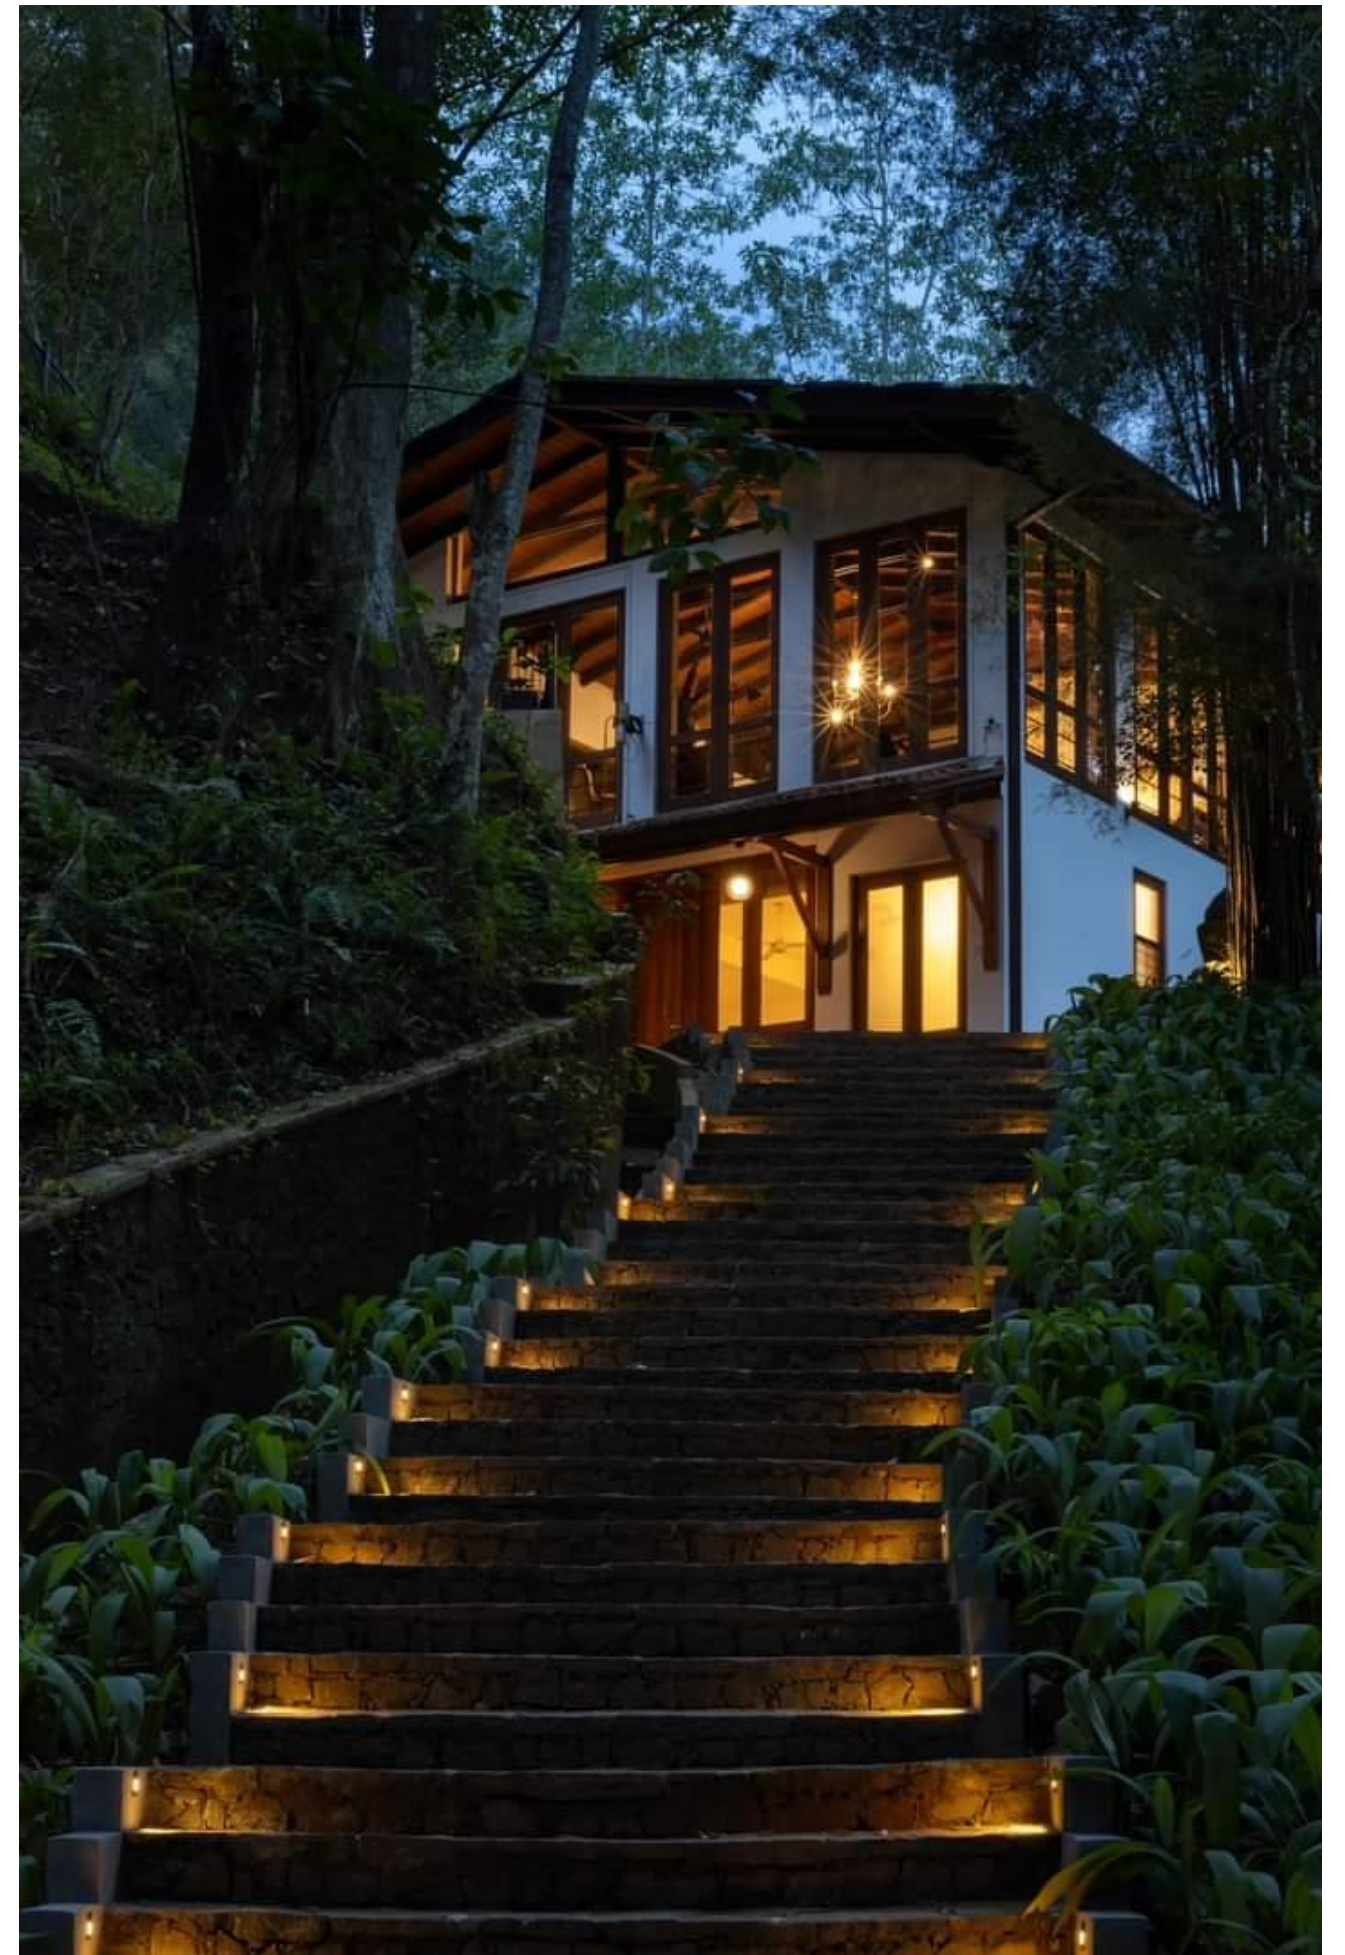

# The Weir House @Ulapane, Sri Lanka

Villa Landscape |

| Client: Mr. Murtaza Ususafally

# Glenross Bungalow @ Neboda, Kalutara, Sri Lanka

Hotel Landscape | Glenross manor House @Villas | Client: Mr. Ajith Wijesekara

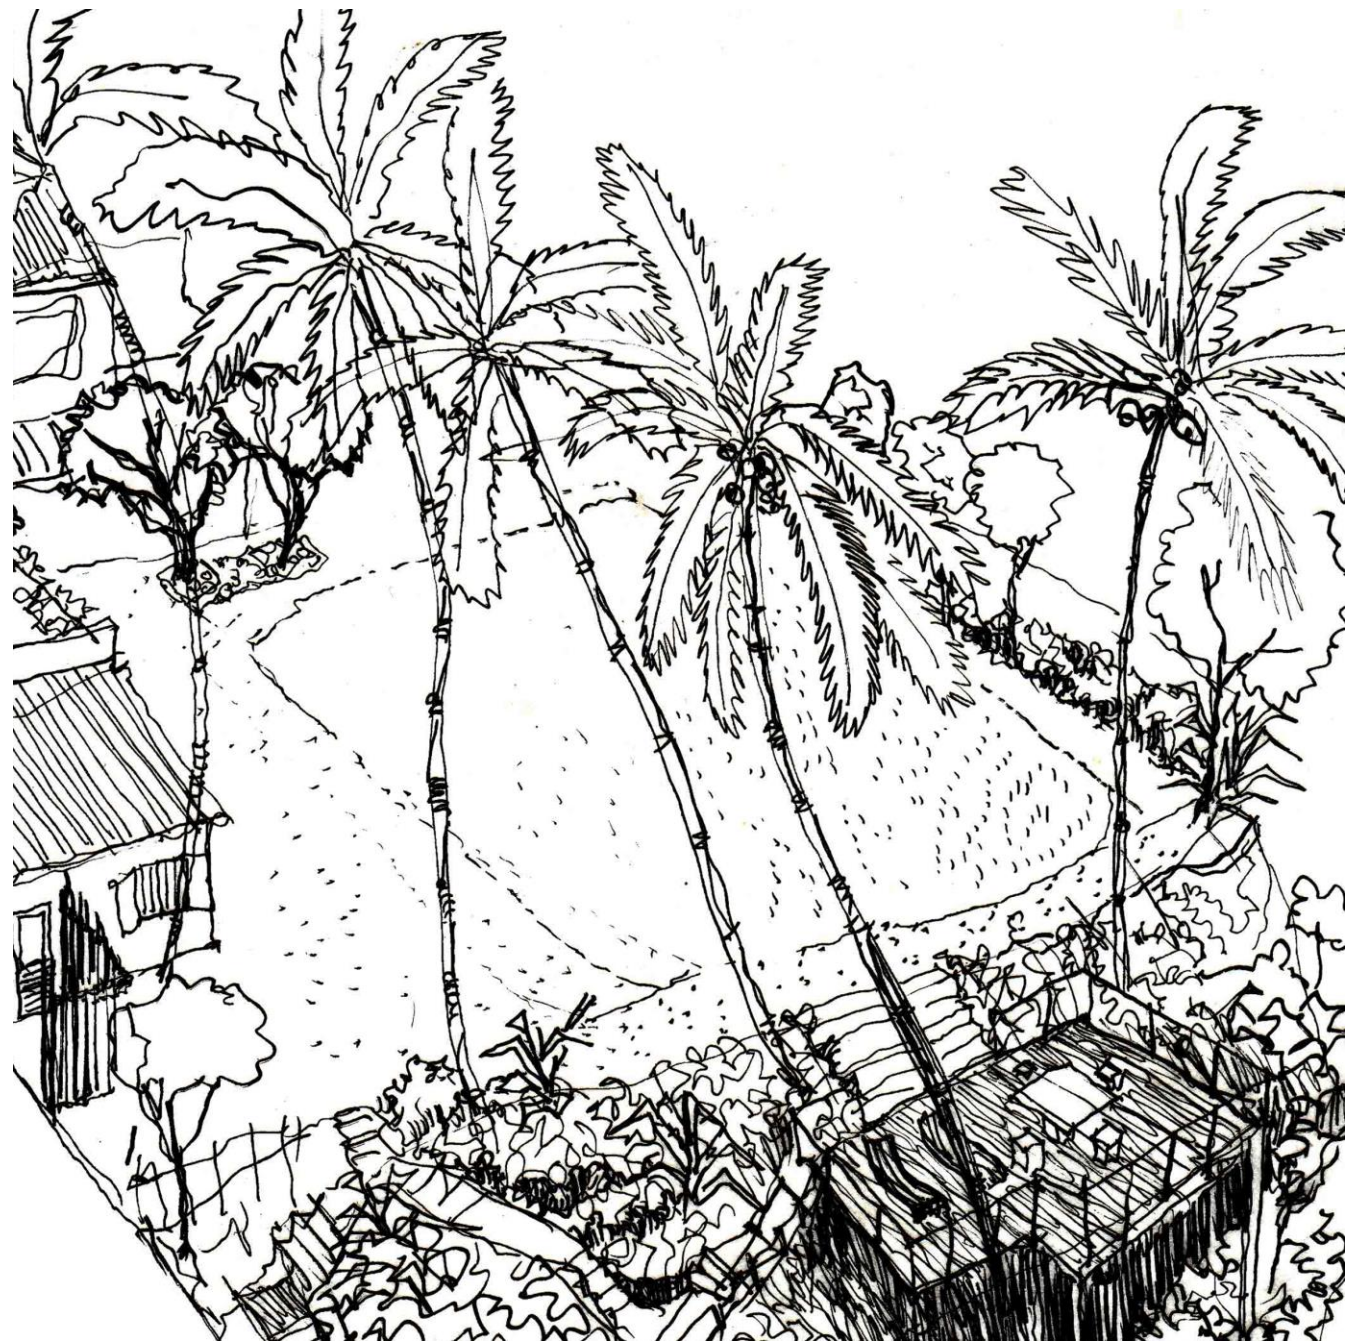

This property has an English bungalow with vintage architectural features. This property was situated in a rubber estate with steep slopes in the wet zone. The designing part gave prominence to enhance the borrowed landscapes, frames and panoramic views. Considering the wilderness which is available in this landscape, we used plants that are unique to the wet zone to improve the pastoral effect by using the concept called organized wilderness.

# Pelicon house Hotel Landscape @ Ginthota, Galle, Sri Lanka

Hotel Landscape | Pelican House | Client: Priyanga Hettiarachchi

This hotel is designed by means of adapting the Old English (archaic) architectural style. We attempted to balance the landscape of the hotel with the existing flat land, river, and sea. Firstly, it is the river which is grabbed into the sight of the spectator. Secondly, it is the sea. This particular landscape structure enables the designers to create a unique landscape which has connectivity. Tropical climatic aspects were emphasized with the use of marine plants as such plants that could adapt to sea breeze. Further, introduction of the observation desk is also crucial.

# Lake Villa by CarlSen Hotel Landscape @Moratuwa, Sri Lanka

Hotel Landscape | Lake Villa By Carlsen | Client: Mr. Senthuran

This ongoing project is a design of a landscape which often floods throughout the year. It contains a villa. We have designed the land to bear the water fluctuations due to flooding by using water friendly plants. The design was created by using patterns that could merge the water body and the building.

# Cinnamon Life @ Colombo

Hotel Landscape | Jhon Keels Holdings | Client: Jhon Keels Holdings

# Hotel Landscape @ Bellanvila, Sri Lanka

Hotel Landscape | Client: Udara Seneviratne

# Apartment & Residential

# Tri-Zen Apartment @ Colombo, Sri Lanka

Apartment Landscape | Jhon Keels Properties | Client: Jhon Keels Properties

# Iconic Galaxy @ Rajagiriya, Sri Lanka

Apartment Landscape

# CK Homes Roof Garden Landscape @ Kelaniya, Sri Lanka

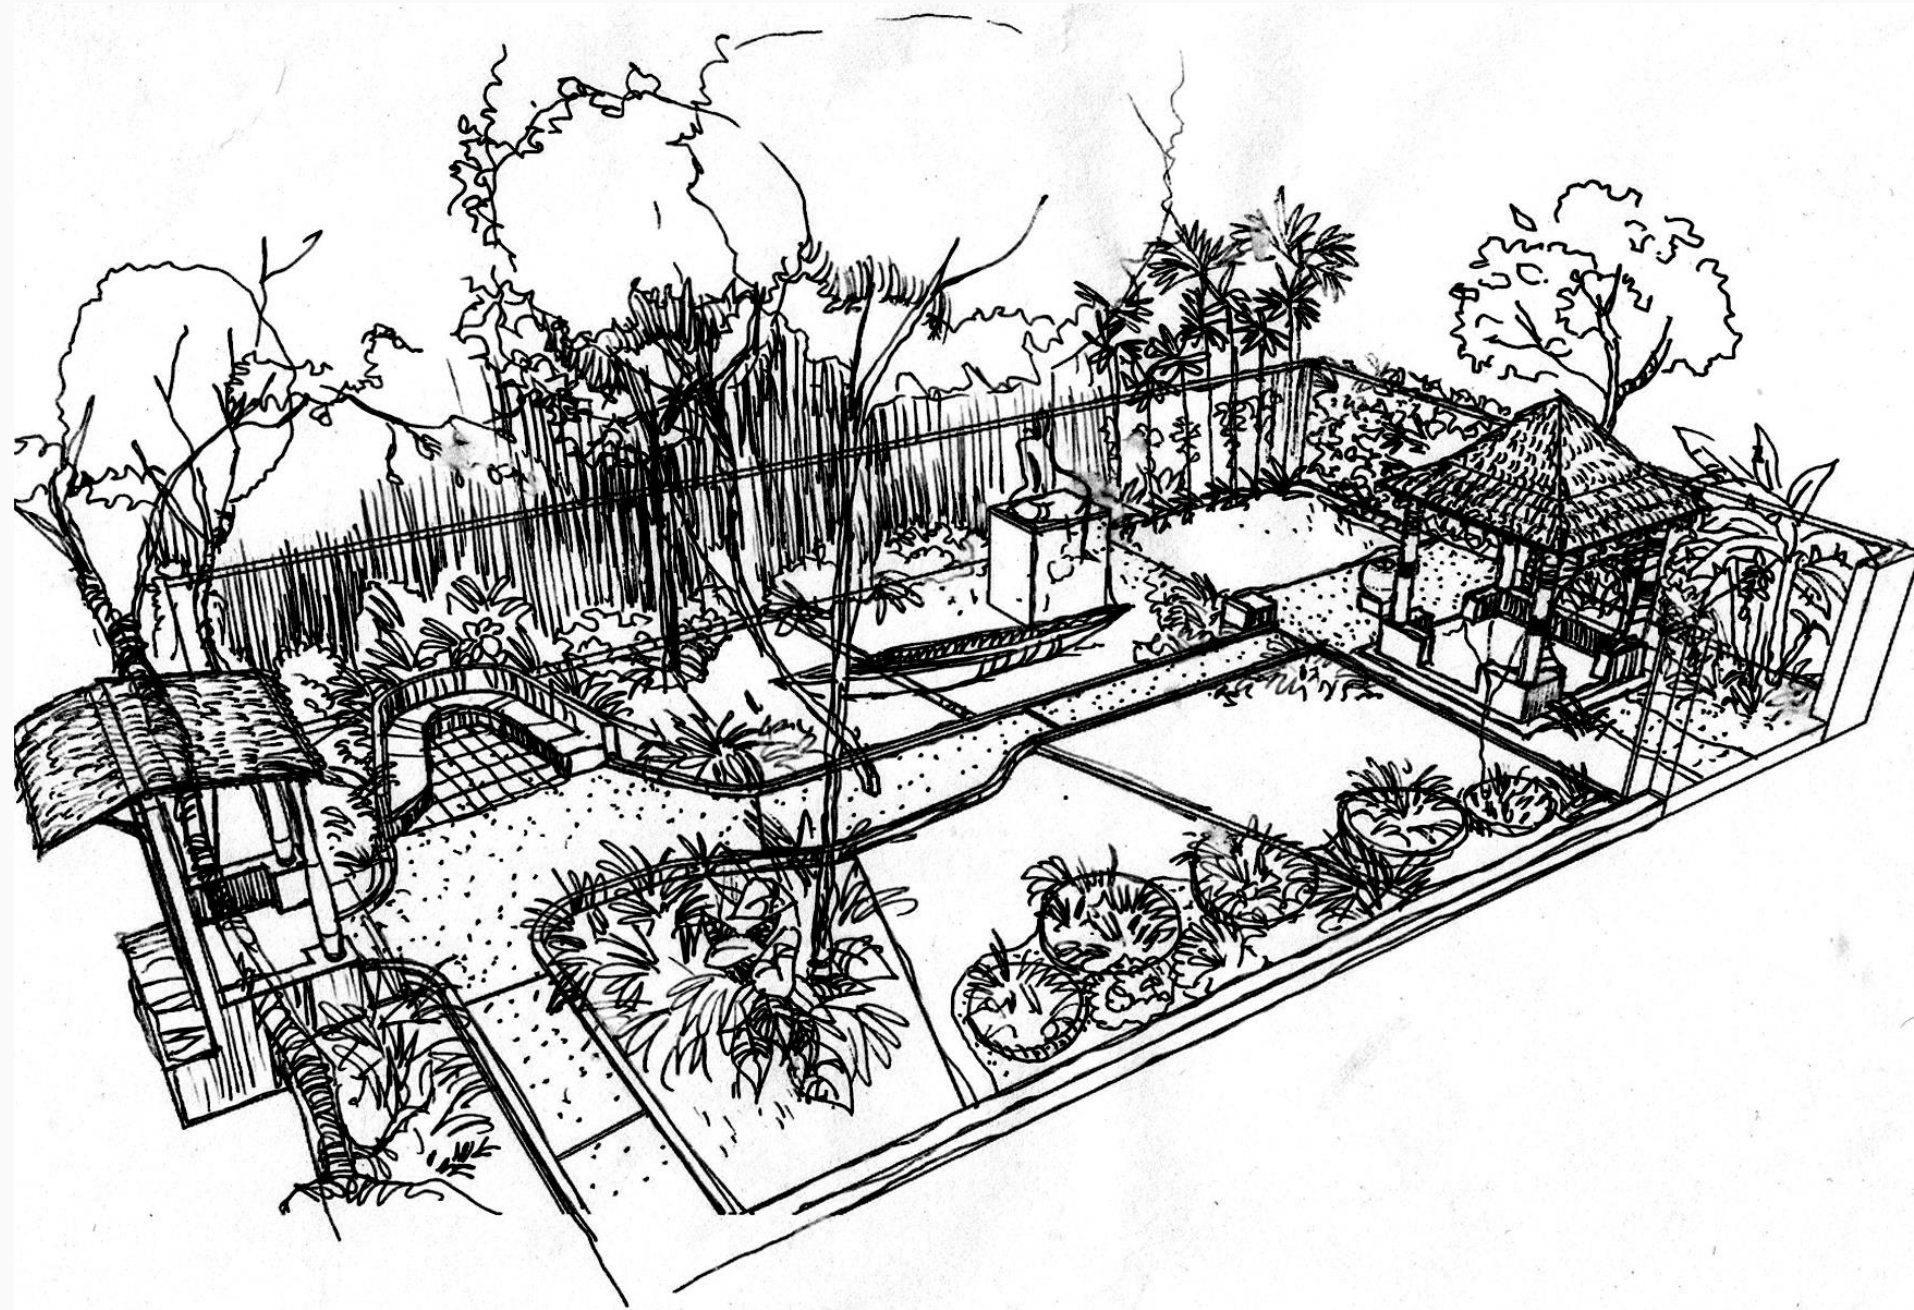

Apartment | CK Homes (Pvt) Ltd | Client: Mr. Channa Kuruppu

# Residential Landscape Design Project @ Battaramulla , Sri Lanka

Residential Project | Client: Dr. H.T. Wickremasinghe

# Residential Landscape Project @ Colombo, Sri Lanka

Residential Project | Client: Mr. Ranil Fernando

# Residential Landscape Project @ Matara, Sri Lanka

Residential Project | Client: Dr. Samith Balapitiyehewa

# Public Spaces

# Nagananda International Buddhist University @ Kelaniya, Sri Lanka

University Landscape | Nagananda International Buddhist University |  
Client: Ven. Bodhagama Chandima

The arrangement of water features, the evening light from the red western sky, wind patterns over the site and the topographic identities of the land with the built fabric is considered as the fundamental substructure elements for the landscape design. The color and smell of the selected indigenous trees may change from season to season and emphasize different harmonic combinations of fundamental elements. Characters of tropical climatic condition are considered in the development of the layouts and selection of trees and the other symbolic landscape elements. The ultimate goal of this landscape design is to create a meaningful place with a pleasing environment by balancing the fundamental properties illustrated in Buddhist philosophy.

# German Cultural Center @ Colombo 07, Sri Lanka

Cultural Center Landscape | Client: German Cultural Center

This project, the recreation of the Goethe Institute, the then Senanayake Bungalow, intended to recreate the lighting patterns of the space and to enhance the cultural identity by placing sculptures. This was designed to suit an evening environment by giving attention to the crowd.

# Gateway College, @ Kandy, Sri Lanka

School Landscape | Gateway College | Client: Harsha Alas

This is a school premises situated in a mountain area with many slopy grounds. This area very often experiences landslides and soil erosions. We were requested to create a harmonizing landscape while giving the priority to children's safety. We used borrowed landscape as the main concept of the project and created terrace spaces to be used as children to enjoy the environment around. Also gave so much attention on creating more spaces which are friendly for students to gather. Premises was landscaped to be low maintenance. To avoid the damages on the landscape in the high traffic areas we used pavings and created a safest and beautiful harmonizing school environment for students.

# Office & Industrial Landscape

# Wind Power Plant Landscaping Project @ Puttalam, Sri Lanka

# SAS Architects @ Nugegoda, Sri Lanka

Office Landscape | SAS Architects | Client: SAS Architects

This project was initiated in order to depict the urban office environment. The landscape was connected with the urban office environment with the intention of maintaining a comfortable office environment to the staff. Shady areas were also created within the landscape. Special plants were selected to maintain the neatness. paving pattern was also incorporated with grass. Heat was reduced and usage of green lighting helped emphasize a colorful environment. Outdoor seating was created by using a bench.

# Foot Ball House @ Colombo, Sri Lanka

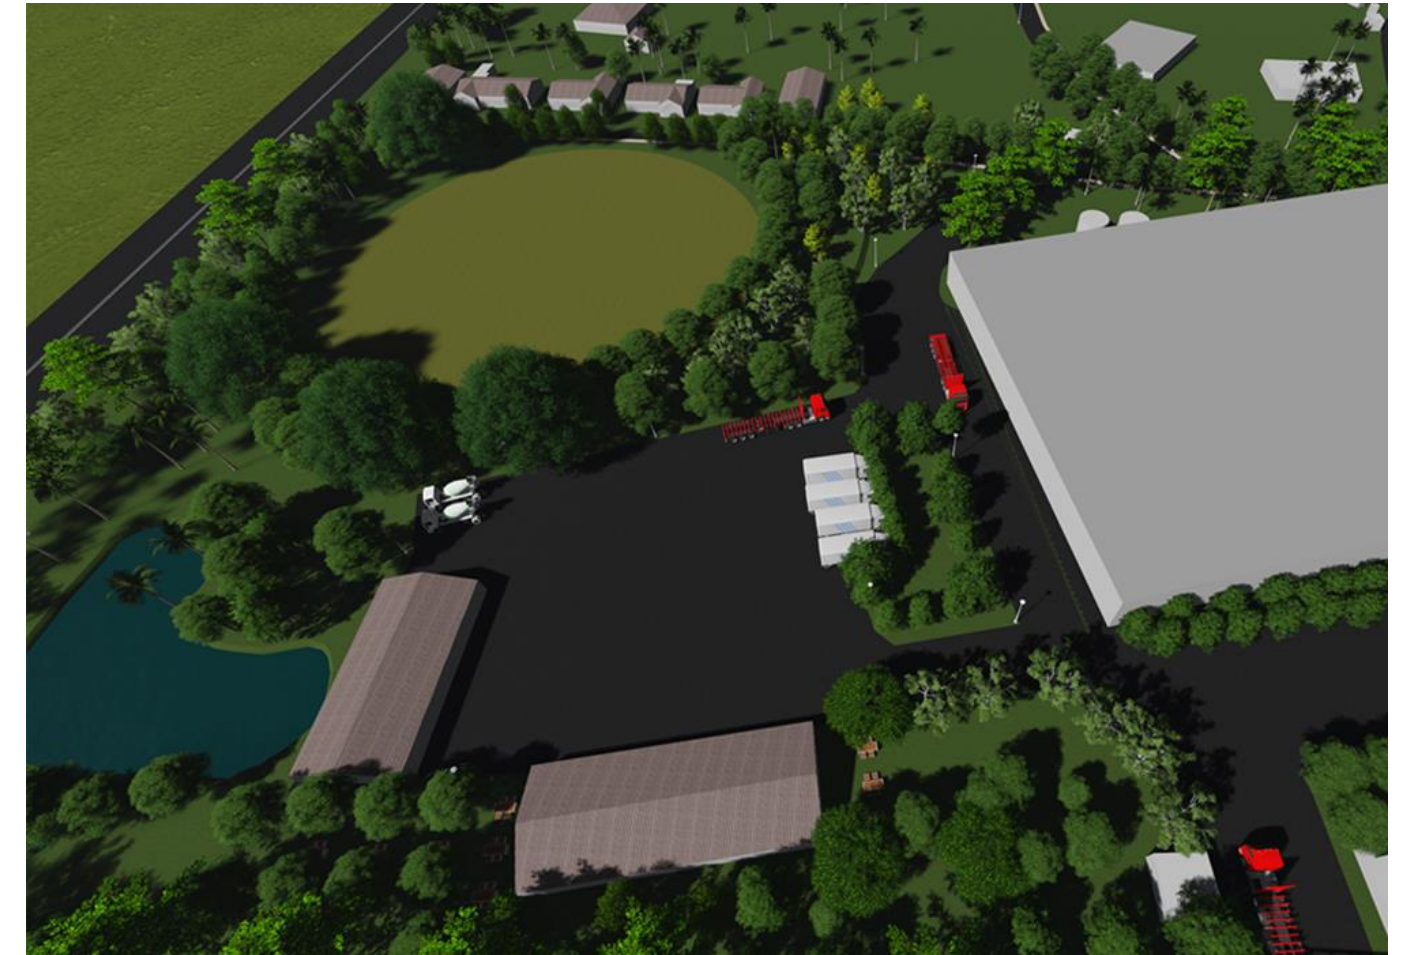

Office Landscape | FIFA Goal Project | Client: Foot ball Federation

# SIAM City @ Galle, Sri Lanka

Industrial Landscape | Client: SIAM City Cement Public Company Limited

# James Finlay Office Landscape @ Welisara, Sri Lanka

Office Landscape | James Finlay

"**Transplantation Harmony**" is an ambitious landscape architectural endeavor that showcases the delicate balance between preservation and progress. This project entails the meticulous relocation of an entire landscape from its current location to a new destination, all while ensuring the preservation of its natural assets, particularly the existing trees.

# Sriyani Dress Point @ Galagedara, Sri Lanka

Industrial Landscape | Sriyani Dress Point | Client: Sriyani Dress Pont

As this Location occupies a space where a large crowd gather, we had to pay more attention to make it well organized and having that in mind this was designed in a way it demands less maintenance and care. Since this landscape belongs to the type of entrance landscape, more shade and color effect were enhanced to meet the demands of the place. Techniques for mitigating the soil erosion have also been used for tis project.

# Kairos Weddings Office @ Balapokuna, Sri Lanka

Office Landscape | Kairos Wedding Planning

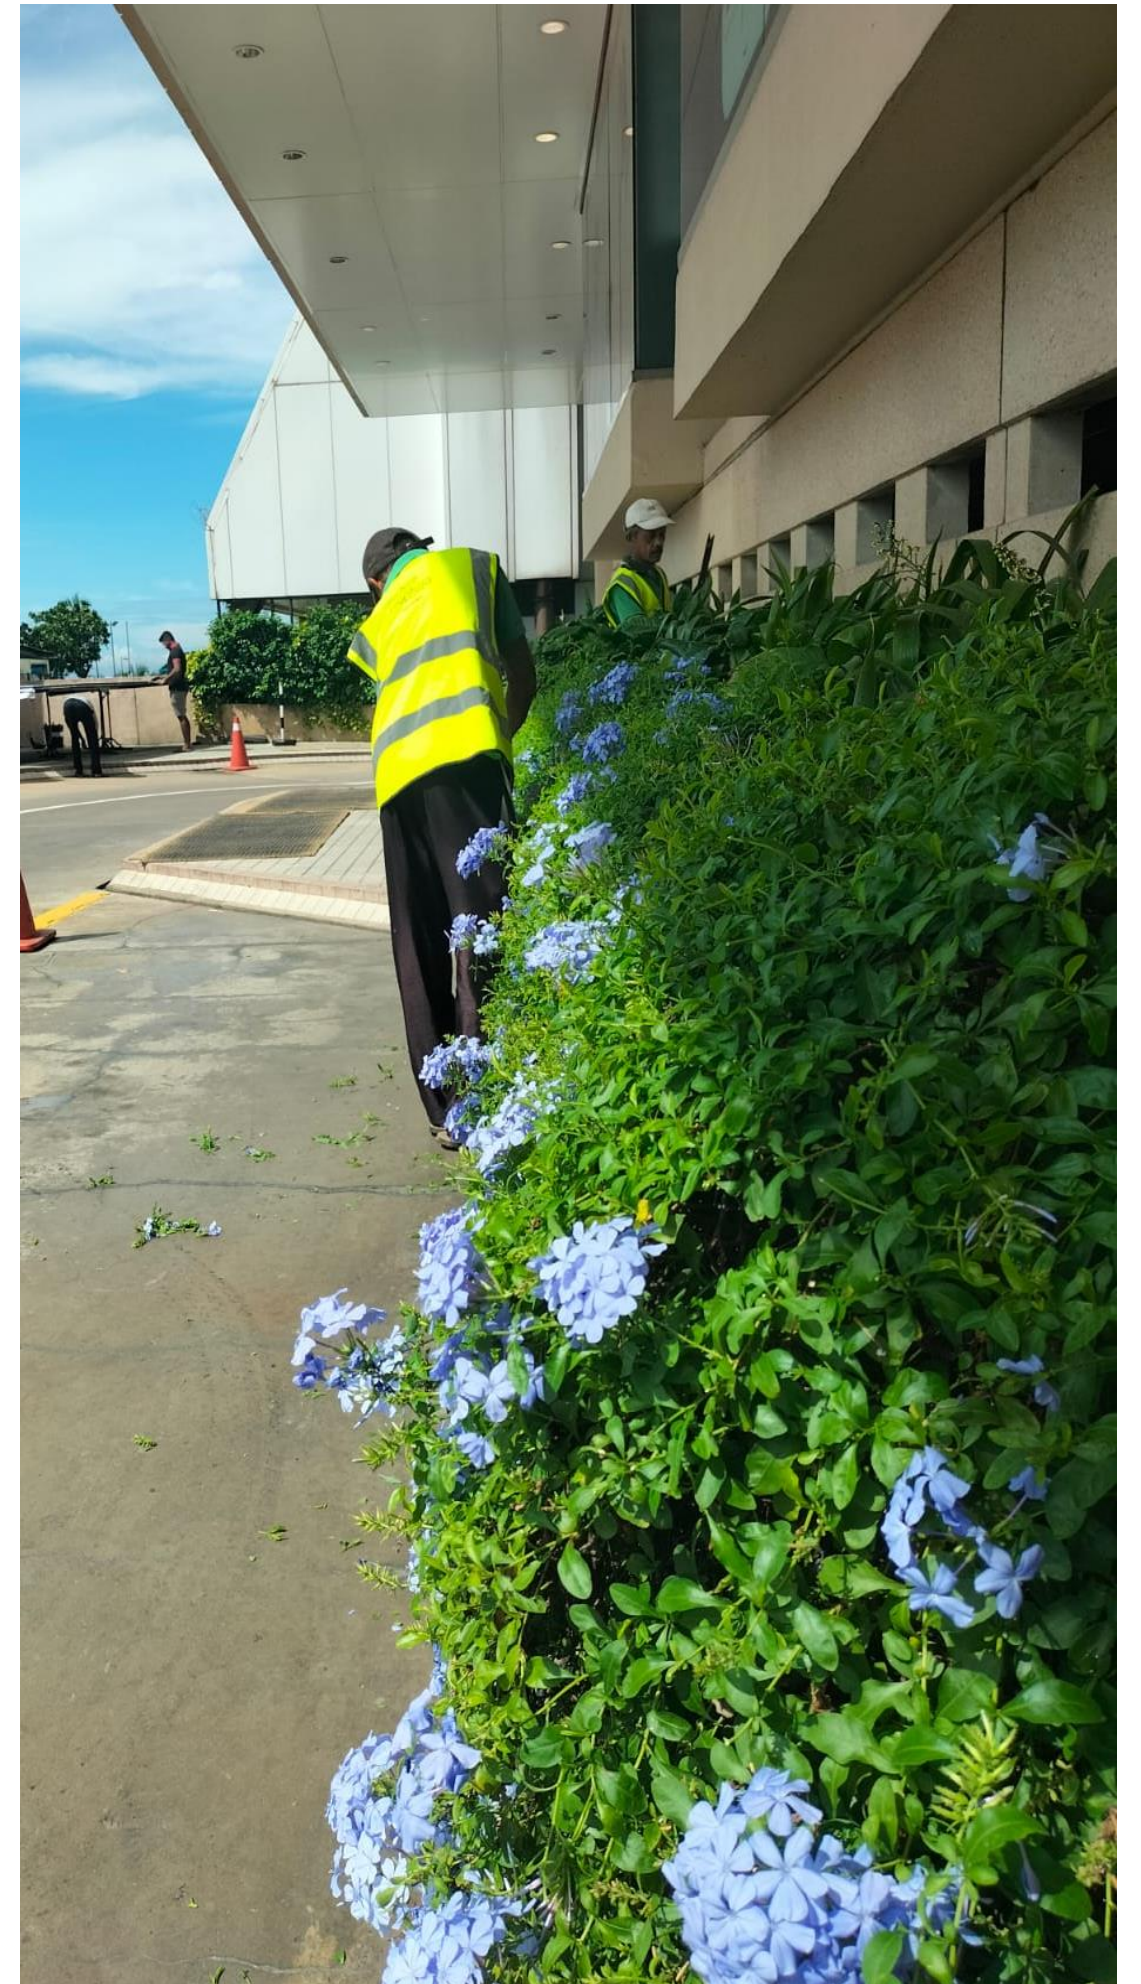

# Maintenance Projects

# World Trade Center, Colombo, Sri Lanka Landscape Maintenance

# Yokohama TWS Lanka (PVT) Ltd @Sapugaskanda, Sri Lanka Landscape Maintenance

# Farm Garden

# Farm Garden Rajarata, @ Anuradhapura, Sri Lanka

Agricultural Landscape | By Biophilia

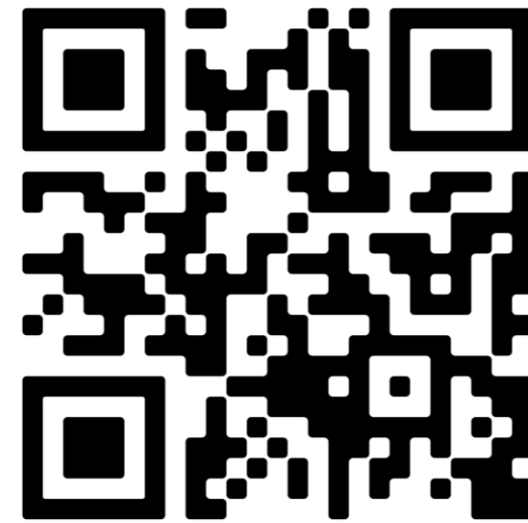

Farm garden, Rajarata is a visionary project that seamlessly integrates the principles of biophilic design, sustainability, and eco-tourism to create a captivating and regenerative agricultural landscape. This aims to reconnect people with nature, promote sustainable farming practices, and inspire a deeper appreciation for the interconnectedness of all living beings.
